We advise that you use a randomly-generated password or passphrase to encrypt the file. We also advise using a different password for each archive. Passwords should be at least 15 characters in length to achieve reasonable security.

If you do not already have a random password generator, these online systems may be used:

https://www.fourmilab.ch/javascrypt/pass_phrase.html https://www.grc.com/passwords.htm

The USB stick containing the encrypted archive may be sent as usual. Passwords should be sent to encryption@wjec.co.uk. The email should
